EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel J. Pereira on April 30, 2004.

2. The application has been amended as follows:

- Replace claim 16 with the following:
"An isolated polynucleotide which comprises a fragment of the polynucleotide of claim 11 and encodes a protein which has the activity of the RodA cell division protein."
- Replace claim 17 with the following:
"An isolated polynucleotide which hybridizes under stringent conditions to the polynucleotide of claim 11 or the complement thereof and encodes a protein which has the activity of the RodA cell division protein; wherein said stringent conditions comprise washing in 0.5X SSC at a temperature of 68°C."
- In claim 48, line 1, replace the word "comprising" with the phrase "consisting of".
- In claim 49, line 1, replace the word "comprising" with the phrase "consisting of".

Allowable Subject Matter

3. Claims 1, 3-6, 10-12, 16, 17, 19-22, 26, and 38-49 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Applicants' invention is directed toward a novel and unobvious polynucleotide encoding a protein which has the activity of the RodA cell division protein, vector containing said polynucleotide, host cell containing said vector, method for making a RodA cell division protein using said host cell, and method for making L-amino acids using said host cell. The prior art neither teaches nor suggests an isolated polynucleotide encoding a protein comprising the amino acid sequence of SEQ ID NO: 2 which has the activity of the RodA cell division protein and an isolated polynucleotide of SEQ ID NO: 1
